HASKELL LAB

HASKELL LABORATORY MEDICAL RESEARCH PROJECT MP-1311  
MATERIALS ENGINEERING  
DUSTINESS OF THERMAL INSULATING MATERIALS

The Materials Engineering Group has decided that any distribution of the subject report should be marked "FOR DU PONT USE ONLY" and be forwarded in direct addressed and return addressed envelopes.

You and I and our immediate associates understand the significance of the report, but misuse of the data in the report by vendors and labor negotiators could cause Du Pont trouble.
