Cleveland, Ohio 44131

Subject: MARK 1900

Dear Mr. Gray:

We have been asked to comment on and to certify the use of MARK 1900 in PVC compound for plastic components that would have some incidental food contact.

We can assure you that MARK 1900 methyltin stabilizer is similar in chemical composition to its FDA version MARK 1984, although it is not certified by our laboratory as conforming to FDA. Moreover, MARK 1900 is approved by NSF International for use in PVC resins for piping system components that carry potable water.

If we may be of further help, please let me know.

Sincerely yours,

Bern Bluestein
