

Medicine--Continued

symposium on dynamics of: presentation of unidentified occupational case history [Hasterlik], *147

symposium on how needs of American workers can be met: viewpoint of personnel administrator [Hall], *173

union: viewpoint [Read], *188

Mental Diseases: See also Psychiatry

vocational rehabilitation of psychiatric patients, 215

Mental Hygiene

in industry: results and possibilities, 323

Mercury

content of air: method for determining, 432

ferric chloride: decontamination and removal of spilled by, 435

in organs of rabbits poisoned subcutely with vapor, distribution, 329

phenyl compounds: hygienic problems in industrial use of, 331

protective clothing for working with, and its cleaning from latter, 539

toxicity of vapors of organic compounds of (ethyl mercuric phosphate and chloride) in acute and chronic intoxications, 421

Metabolism

beryllium poisoning: chronic, study of case treated with ACTH [Hardy & others], *579

worker's basal: contribution to investigations, 412

Metals

heavy: BAL in poisoning, 424

carbonyls: carbon monoxide poisoning, danger in conversion of hydrocarbons and manufacture of, 335

Metal Workers

fatigue and heat: effects on, 207

Metallurgical Industries

silicosis in: in France, 210

Meteorology

factors affecting air pollution surveys [Elsenbud & Harris], *90

micro-climatic factors in smoke pollution from tall stacks, 111

micrometeorological variables: forecasting of, 111

Methionine

histopathologic modifications in experimental intoxication due to trinitrotoluene, following therapy with lipocalc (pancreatic hormone) and: behavior of kidneys, adrenals, spleen, lungs and heart, 330

Methyl Bromide

poisoning: fatal case due to inhalation of, 415

Methyl Chloride

intoxication: due to refrigerator gas, epidemiological study, 330

Methyl Iodide

toxicity of: preliminary study, 421

Methylpolysiloxane

toxicity: chronic, in dogs [Child & others], *479

Micro-organisms

triethylene glycol vapor: rate of bactericidal action on, dispersed into air in small droplets, 435

Milk

DDT: occurrence in human fat and [Laug & others], *245

Mines and Miners

accidents: detailed classification of, 539

diseases: anthracosilicosis, roentgenologic aspects of, 102

diseases: manganism in French Morocco, 103

diseases: pneumoconiosis, classification of radiographic appearance in, 523

diseases: saturnism in lead miners: survey in Marrakech region, 107

diseases: silicosis, acute, from rock excavation, 105

diseases: silicosis in metal mines of Japan, report on country-wide study [Yamamoto], *339

Mines and Miners--Continued

diseases: silicotic pneumoconiosis treatment, 103

dust-allaying: review of practices at working faces in some bituminous coal and lignite mines, 219

dust in Belgian coal: campaign against, 436

explosives, new safety: for dusty or fiery coal mines, 435

injuries: of semilunar cartilages, review of 200 cases, with special reference to postoperative disability time, 334

instruments: Bruck-Vigliani method for aspiration of drilling dust in experiments, 336

instruments: dust respirators, use in coal mines, 336

instruments: water-spray drills, new studies at Amercoeur coal mines, Hasselt, Belgium, 1950, 221

locomotive haulage, observations on effect on environmental conditions, 335

locomotive traction material: physiological response to dust from, 524

safety achievements: research and problems yet to be solved, 336

safety: research, Ministry of Fuel and Power, London, 219

ventilation: routine surveying in south Wales anthracite mines, 219

wetting agents: experiments for dust suppression, 436

Mists: See also Air, impurities; Dust; Fumes; etc.

collection: of dust and, for particle size measurement, electrostatic precipitation on hemocytometer, 431

Monoxide Poisoning: See Carbon Monoxide

Morbidity Rate: See Vital Statistics

Myocardium: See under Heart

Nair, J. H., III

Toxicological study of some polypropylene (polyoxypropylene) glycols, *448

Nasopharynx

radiation: exposure to, from applicator, 113

Neon Sign Industry

berylliosis: chronic, in [Sander], *565

Nephrosis: See Kidneys, diseases

Nervous System: See also Brain

vascular disturbances of central: carbon disulfide poisoning, 421

Neuritis

multiple: BAL, adverse effect in case of subacute, with observations on porphyrin metabolism, 428

Nickel

cytostopathological changes due to experimental administration of, 330

Nitrogen

nitrous fumes: poisoning by, arising in cleaning inside of pipes chemically, 337

oxide: study of concentrations during arc welding [Silverman & Husain], *135

Nitrotoluene

trinitrotoluene: histopathologic modifications in experimental intoxication due to, following therapy with lipocalc (pancreatic hormone) and methionine: behavior of kidneys, adrenals, spleen, lungs and heart, 330

trinitrotoluene intoxication: experimental: phenol in blood and urine, 108

trinitrotoluene poisoning: diagnosis, treatment and prophylaxis, 536

trinitrotoluene poisoning: peripheral blood and myelogram in experimental, 108

Noise

human behavior and communication: effects on [Davis], *227

in industry: Conference of American Medical Association, 232

occupational deafness and: in industrial plant, 217
