SUBJ: PROPOSITION 65

Dear Mr. Slatterly:

Vista ALFONIC 1412-60 Alcohol Ethoxylate may contain detectable quantities of ethylene oxide, which appears on the Proposition 65 list. The typical concentration is less than 1.0 ppm. Vista's data from workplace monitoring indicates significant exposures to personnel handling ethoxylated alcohols does not occur. However, we do not know the conditions in your operations that may result in exposure, and cannot make this conclusion for your workplace.

Please call me at 713/531-3445 if you need to discuss the above.

Sincerely,

Thomas G. Grumbles, C.I.H.
Environmental Quality Manager
