PLAINTIFF'S EXHIBIT

SII-2769

April 4, 1988

From: Katherine J. Moore, RN, COHN
Supervisor, DPMC Medical Department

To: S. R. Cowles, M.D.
Corporate Medical Department

Subject: Update re Sr.
(Memo of 2-2-24)

Today I spoke with ., when he picked up the copy of this retiree's medical record.

Dr. Kern told me you were interested in talking with doctor. I relayed this request to his son, who is quite cooperative. , is a former DPMC employee, who resigned in 1984 to take is present position as a Harris County Constable. (see copy of business card) He gave me the following information regarding his father's physicians:

Dr. Stuart Myers, surgeon at Herman Hospital
Dr. Larry Konig, (apparently on Dr. Myers' staff)
Drs. Danberg and Moffett, renal specialists

According to his son, has had recent amputation of both lower extremities, an above-the-knee amputation of the right leg, and a below-the-knee of the left leg. The family has also been told that there are x-ray findings indicative of Asbestosis.

At the present time, is being cared for at the home of his daughter, where he is on home dialysis. I am told the daugher is a nurse. apparently has several medical problems in addition to the leukemia and Asbestosis.
