Monsanto Europe

From D. Perry - Brussels. cc: E.P. Cunningham, SL

DATE March 25th, 1964

SUBJECT PYDRAUL - Germany.

REFERENCE DP/ha

TO B.F. Smith,
B-2-S, St Louis.

Dr. Zimmermann, Hygienic Institut - Gelsenkinchen, Germany asked Kurt Selk for a statement from Monsanto signed by a medical man, to the effect that Pydraul has been in use for X years with no serious toxicity problems encountered etc etc.

Zimmermann may have forgotten about this request, but K.M.S. would like to have such a letter, (addressed to Zimmermann) in his hands ready to fire - can you oblige please?

If the medical peolpe would rather send it direct to Zimmermann please do so but, send a b.c.c. to K.M.S.

Would you please send K.M.S. and I up-to-date copies of Cellulube literature, and if there are no max. bulk temperatures quoted comment upon any knowledge we may have of their recommendations.

Denis Perry

Pydraul - As a class - F-9 - 1950 -
625, A 200, AC
1955 1958 1955
