Dave,
I hear you are the env coordinator for the C8 issue..I want to get some feedback from you.

I have inherited resp for Haskell as well as folks in the leveraged services in CR&D (Gannon's grp , CCAS)

I am interested in discussing strengths of the org as well as issues you see in the timeliness of service response.

Do you have to deal with a lot of different interfaces besides CR&D? including corp SHEA, DuET, etc?
As a customer what do you wish you had from us that would make your life easier?

Do send me an email or call 695 9501

Thanks much and I look forward to hearing from you at your convenience,
Uma
