Looks as though we had better revaluate

FOSECO, INC.

INTER-COMPANY AND INTER-DEPARTMENTAL CORRESPONDENCE

TO: E. J. Jago

FROM: F. S. Bilton

DATE: February 26, 1971

SUBJECT: RM 265A

Please see the attached letter from Gerry Morgan of North American Asbestos. Also the 2-24-71 Memo from Bill Brenner from which it appears that we shall be using - in the Cleveland plant alone - around 1200 tons this year.

I called Gerry Morgan today to advise him of our increased consumption of Amosite Asbestos, and learned that he is leaving for England tomorrow. The purpose appears to be to make a pitch for increased shipments to the U.S.A., and he tells me that the mines are oversold for this year.

In view of this, I am sure that you will want to review the situation regarding grade S44, as described in Miles Macnair's letter of October 7. Despite the unfavorable Lab report (M-4924) it was recently necessary for us to take a truckload of this material in order to keep the plant going.

never tipped toward that ... received a truckload 7 - 14 as we may Have

In view of Bill Brenner's forecast of approximately 1200 tons for the Cleveland plant alone (~~this~~ your projection of 800 tons for Cleveland and Chicago combined) it will no doubt be necessary for us to use every grade we can, and for that reason I am sure that you will want to see whether official approval can now be given to the S44 grade, although I understand from Gerry Morgan that this will not be available until around September.
