A Yes.

Q Okay. I would like to do the same thing. Let's assume a six-day work week.

A Sure.

Q So we take the 100 days and we divide them by six and if my math is correct, we get somewhere between 16 and 17 weeks, right?

A Correct.

Q Okay. I think that both Mr. Carter and Mr. Butler testified when they got to the garage at Preston Street, the vehicles that they were working on were pretty old.

Is that your recollection?

A Yes, sir. The immediate postwar period.

Q I think it might have been Mr. Carter who actually said they were falling apart.

A Yes.

Q So taking the range that we have already established, which is if you have nine brake jobs a day, it would take five and a half weeks to get through the entire fleet, and if you have three a day,
