ASBESTOS FREE LABELS

June 17, 1974

*TO: Messrs. K. W. Brown - Acme
J. D. Rauch - Akron N Y
M. A. Palmowski - Chgo Jt Sys
R. V. Favero - Marietta

Each joint cement manufacturing plant that produces bagged goods has en-route to them a supply of asbestos free labels to be used with vinyl asbestos free material as well as textures. These labels are to be placed across the upper one third of the front of the bag. At present only Acme and Marietta will use these labels. As casein is phased out and vinyls take over at the other two plants, these labels will be used until bags are in use which have "asbestos free" printed on them.

We will appreciate your using these labels as soon as they are received.
