As results indicate that you have been exposed to acrylonitrile (AN) levels above the permissible exposure limits, it is required that you utilize the proper respiratory protection devices which are available to you to reduce your exposure below the permissible exposure limits. Work practices have been implemented and engineering controls have been installed to reduce your exposure to or below the permissible exposure limits for acrylonitrile. A copy of the Engineering Control and Work Practice Control Plan for Compliance is available for inspection in the Industrial Relations office.
