MANUFACTURERS AND LABORATORIES WITH PRODUCTS OR SERVICES FOR CONTROLLING ASBESTOS

In order to reply to inquiries that we receive concerning questions such as laboratories for asbestos counts or manufacturers of vacuum equipment for use in an asbestos environment, we have made tabulations of certain manufacturers or laboratories involved in these areas. I'm enclosing listings that we have on file with addresses for these laboratories and/or manufacturers. The information that we have is as follows:

1. Laboratories for asbestos consultation and/or asbestos fiber counts.
2. Manufacturers of reusable respirators.
3. Manufacturers of disposable respirators.
4. Manufacturers of vacuum equipment intended for use in controlling asbestos waste.
5. Manufacturers of equipment intended for collecting brake lining dust.
6. Manufacturers of disposable protective clothing.

I'm enclosing copies of these lists which might be helpful to your environmental or occupational health people to answer any inquiries as to sources of equipment or services. In the past, we listed indicated prices and individuals to contact for the asbestos counts. However, we are dropping this as these factors have been changing so rapidly. We suggest that anyone wishing to contact one of the manufacturers or laboratories write to the address indicated or seek the telephone number from the telephone company. The foregoing is for your information.

E. W. Drislane
