Mr. R. F. Murray
Assistant to the General Manager
Canadian Titanium Pigments Ltd.
1401 McGill College Avenue
Montreal 2, Quebec, Canada

Dear Bob:-

As you may recall, we met at the Rubber and Plastics Group outing in St. Hyacinth last June and had a very pleasant conversation during dinner.

I have just read a brief submitted to the Tariff Board by your people with relation to dibasic Lead Stearate. I was very interested in the comments in the brief relating to dibasic Lead Phthalate and the fact that you were contemplating having certain lead chemicals of this type manufactured for you on a toll basis. As you know, our plant in St. Johns, Quebec is basic in lead chemicals, making certain chemicals from Pig Lead to be used in subsequent manufacture of pigment colors.

We have been interested for sometime in broadening the base of our St. Johns operation and have watched with interest the Canadian imports on these chemicals. We would be very much interested in any possibilities for our manufacture of lead chemicals for you.

I would be very happy to come to Montreal to explore this problem with you, should there be any interest on your part.

Very truly yours,
HERCULES POWDER COMPANY (CANADA) LTD.

W. O. Nicoll
Assistant Manager
