

1/12

17th May, 1942.

Dr. A. G. Cutner,
Commonwealth Health Laboratory,
RA 301217.

Dear Dr. Cutner,

The Australian Blue Asbestos Ltd.
have approached this department with the request that
we X-ray the employees of their company prior to
their going to work at Littenoon Gorge. It is desired
that each of these men obtains a certificate equivalent
to that which is given by the Commonwealth Laboratory
at Melbourne.

It is understood that Mr Foxall, the
State Mining Engineer, has written to you on this
matter.

I would be pleased if you could let
me know the details of the examinations that are nec-
essary, and any other information you could give would
be very helpful. We would like our procedure to be
the same as yours, and therefore your help would be
appreciated.

Yours sincerely,

Lilley Wenzell.
Director, Tuberculosis Branch.
