ASBESTOS
Health Report

A copy of page 7, Chemical Week magazine of October 3, 1966, discloses a couple of letters relating the article appearing in the same periodical on Sept. 18, 1966.

This may help to quiet the fear that was aroused by Dr. Salikoff's stigmantic report on "Lung Cancer from Asbestos".

The Purchasing Department has a file on the entire subject including the Canadian Health Department report of May 30, 1949, when the subject was previously incited.
