Subject: Some observations for consideration on parts of the summary reports

Dear 5.1.2e,

On behalf of Chemours' Advanced Performance Materials business, we would like to thank you for the opportunity to submit additional information in addition to the our response to the 2nd Call for Evidence, as submitted on October 14. We value your continued collaboration and openness to input from varied stakeholders across the EU industrial value chain.

We hope our input provided in the questionnaire form helps provide clarity on the uses, socioeconomic contributions, and lack of viable alternatives to fluoroproducts. For ease of reference, please find attached a copy of our questionnaire response – submitted in parallel to Chemours' Thermal & Specialized Solutions questionnaire response – to better capture product-specific information.

We would also like to thank you for providing summaries of expert reports of the input that you have received to date. It was useful to have an clear understanding of the methodology and definitions used in these analyses. After carefully reviewing these summaries, we would like to share some of our observations for your consideration.

Attached, please find a document in which we highlight some observations for consideration on parts of the report summaries (in addition to several already made in the contribution to the 2nd Call for Evidence) or make note where our data on the fluoropolymer product and market differs from the relevant summary. We hope for the opportunity to discuss these differences at an appropriate time, to ensure a shared complete and accurate understanding of the fluoropolymer product and market in Europe.

Chemours supports a coherent regulatory framework that promotes safe and sustainable chemicals in the EU, and we are committed to supporting this regulatory process along those principles. We hope the information submitted is useful in this process. Please know if it is ever helpful, Chemours' fluoroproduct experts are ready and able to share additional information.

We look forward to maintaining an open dialogue as this process continues.

Sincerely yours,

5.1.2e
