

Scientists Gather at Navy School Meeting

More than 250 scientists gathered at the Naval Postgraduate School yesterday for the third Navy Microelectronics Program Conference.

Topics of the three-day meeting range from the use of microelectronics in oceanographic research to microelectronic requirements of biological scientists.

Carl E. Menneken, the school's dean of research administration, said that microelectronics, used extensively in space research and modern weapons systems, conserve weight, space and electrical power while increasing reliability.
