Re: Facts about Lead in the Atmosphere

Enclosed is a copy of the final (we hope) version of this bulletin. We are shooting for a printing date which will allow us to use it at the December National Conference on Air Pollution. Therefore, we ask that you please hold your comments to the barest minimum and have them in to us at this office by Friday, November 4th. This will allow approximately four weeks production and printing time, which is what we need.

This version of the bulletin has been prepared in conjunction with our public relations advisors and the staff here and follows in general from the material originally prepared by Dr. Stoppe of the Haskell Laboratory.

Thanks much for your fast cooperation in this effort.

Very truly yours,

Don G. Fowler
