
ROYAL INDUSTRIES

TO: All National Accounts

A NEW PRODUCT!! A Portable Parts Washer that:

1) eliminates the problem of asbestos dust, and

2) speeds up your brake jobs - all parts are at the job rather than taking the parts to the washer.

After field testing, one of the major mass merchandisers is putting one in each store. We have found that once we put the parts washer into an auto center, the Auto Center Manager would only let us take it out "over his dead body".

If you are interested, call or drop me a note and we will show you one or let you test one.

We look forward to serving your needs.

Cordially,

ROCHMAN DIVISION
