Membership List

JANUARY 1953

Published by
THE AMERICAN SOCIETY OF MECHANICAL ENGINEERS

29 West 39th Street, New York 18, N. Y.

FOREWORD

Both alphabetical and geographical lists of members of all grades except Student Members are included in this issue of the Membership List of The American Society of Mechanical Engineers. On page iii is a list of Members of the Council and certain members of the Secretary's staff. Sources of information about the Society are listed on page viii.

ALPHABETICAL LIST

Each entry in the Alphabetical List covers the member's grade and year of membership. The symbols indicate registration in Professional Division, Society office held or award received, and his address.

The dates and letter symbols in parentheses immediately following the name of a member indicate his grade of membership and year of election or promotion to each grade. Where a single date is not accompanied by a letter symbol, the grade of Member is to be understood. Also, where several dates are given, with no letter symbols, the final date indicates the year of election to full membership. The key to the symbols appears on the following page.

PROFESSIONAL DIVISIONS REGISTRATION

One or more letter symbols appearing in a second parenthetical group designate Professional Divisions of the Society in which the member has signified his interest. Members have been given the opportunity to register in from one to three of the twenty-one Professional Divisions of the Society. If a member failed to bring his Professional Division registration up to date, his latest previous registration has been retained. In most cases the symbols are given in alphabetical order. The key to the symbols is given on the next page. Members may revise their Professional Division preferences at any time by writing to the Society.

ADDRESSES

The addresses given are, in most cases, those on record and in good standing on September 30, 1952. Late returns were incorporated as long as was possible without causing further delay and an excessive increase in publication costs.

There are 37,205 names in the book, which include Honorary Members, Fellows, Members, Junior Members, and Associates. The Society also has 7,000 Student Members (December 1, 1952) at 135 accredited engineering college Student Branches in the United States and Canada, whose names are *not* listed. The names of the Student Branches are listed on page 476.

FOREWORD (continued)

GEOGRAPHICAL LIST

The Geographical List gives the names of those in each locality. On page 388 is an index giving the page number for each country.

In the United States and Canada, the name of each city which is part of a Section is followed by the name of that Section.

Members residing in cities where no Section is indicated may affiliate with any Section, without additional dues, upon request to the headquarters of the Society. Members are grouped according to the mail address unless otherwise requested.

RESTRICTIONS ON USE OF MEMBERSHIP LIST

This Membership List is issued for the personal use of members of The American Society of Mechanical Engineers in connection with Society and professional affairs. Each member is expected to conserve his copy and not to permit it to be used for the basis of circularization.
