Subject: AGC reg 61 notice - update and next steps
Attachments: AGC Reg 61 notice 3.docx; AGC cover letter 1.docx; AGC Guidance 2.docx

Hello [REDACTED]

Apologies for the gap in responding to you on a variety of matters, I was on leave and returned with bout of Covid so I was off most of last week.

I have been asked to forward this draft notice to you, could you let me have any comments by the 3rd April?

Some information we have been asked to gather

- Grid references for emissions points (I think [REDACTED] may have gathered this already)
- Clarification on if seasonal changes affect discharges, from which we can amend the monitoring period accordingly
- an estimate of how long you think they will need to complete the works required in the notice
- any other comments or feedback on the work we require you to complete

Any other questions or issues then let me know although I will be away from 24th March , returning on the 3 April.

If you think it is more useful, we will arrange a Teams call with those involved -let me know your thoughts on this.
