

DATE 1-26-77 INSTRUCTOR(S)

DESCRIBE WHAT HAPPENED (Major points covered, what was demonstrated, what was practiced, what training aids were used, etc.) Attach separate sheet if necessary.

Reviewed the Lab's first aid and medical cases and goals for 1976. Recognized each one for their contribution towards the LAB reaching its goal for 1976. Commended each one for the good job they did in 1976 in reporting injuries. I then showed a film on "Safety in the Chemical Laboratory." After showing the film, I covered some points of safety shown in the film on the proper handling of chemicals. The handling, storage and disposal of Acetone was covered.
