LETTER OF

SUBJECT LEAD CONTAINING PAINTS
ULTRA HIDE ALKYD FLATcc: J. D. Russell - UCB
D. W. Eugene - UCB
C. W. Wright - UCB
H. J. Kiefer - UCB
S. T. Howell - DPJ
W. M. Tomc - DPJ
R. J. Haviland #1

Your letter of April 14, 1971 brought to our attention four products in the Ultra Hide Alkyd Flat line which contain more than 1% lead. These products Y-5794, Tiber Green; Y-5795, Red; Y-5796, Yellow; and Y-5797, Orange. Question was raised as to whether these items should be reformulated or whether they are to be discontinued.

We are at present running field tests on the new three "X" bases; and if these prove satisfactory in the field test, the above four items will be discontinued. No decision can be made at this time but we expect to have answers on these field tests within 1½ to 2 months. Consideration or discontinuation of these items can be given at that time.

W. O. B.
