a lot of times you just can't prevent it, but what we can do is we can limit the amount of exposure; is that correct, to all of these things?

A Yes. Again, they were trying to give guidance in terms of exposure. Not fine lines, but at least guidelines.

Q Let's read what they had to say.

These values are based on best available information from industrial experience, from experimental studies and when possible, from a combination of two.

Am I correct and correct me if I am wrong, what they are saying is back in 1953, based upon everything they have in 1953, not 1996, this is what we think today; is that correct?

A Yes.

Q This is what is known as state of the art; is that right?

A Yes.

Q That is why you are here today to testify, that is one of the reasons, right?
