Subject: Hello. Please help me help you.

Hello. My name is Griffin. I am a citizen of the United States of America. The most powerful and vitally influential country on this planet we call home.

No matter your political or partisan view. The regulations and protections outlined in the Obama-era **ENVIRONMENTAL PROTECTION AGENCY** plan called the "Clean Power Act" are vital to the protecting of our country's and the earth's inhabitants who call this celestial body home.

I am a certified emissions tester for the state of Washington and I do 10-50 tests a day on vehicles. It is a annoying but I can see the positive impacts this test concludes on each automobile. Emissions tests have nothing to do with this act but anything that is already in place today should stay in place. No more repealing. Just please stop taking the big money from corporate America to de-regulate our companies and power plants to allow them to have lower operating costs, at the expense of the earth's very well being!!

I'm tired of Trump and his conservative idiots believe that climate change is a hoax when clearly 4 hurricanes within 4 weeks points directly to it. Like seriously! Are you blind?

Please please please do not repeal the "Clean Air Act" and please revise the EPA's 4 year plan to include the research and development funds necessary for reversing climate change. And please for the love of all man kind. **DO NOT PULL OUT OF THE MOST CRITICAL AGREEMENTS OF THIS CENTURY. DO NOT. I REPEAT DO NOT PULL OUT OF THE PARIS CLIMATE CHANGE AGREEMENT.**

Griffin
