FELIX EDGAR WORMSER, SECRETARY AND
TREASURER

June 7, 1937

Dr. Robert A. Kehoe
University of Cincinnati
Cincinnati, Ohio

Dear Dr. Kehoe:

Have you by any chance read the article which appeared in the May issue of the SCIENTIFIC MONTHLY entitled, "Health Hazards of Chemo-Enemies in Contaminated Foods" by Prof. P. J. Hanzlik?

He makes numerous statements in his paper which strike me at variance with your own findings at the University of Cincinnati. Moreover, I can see no evidence submitted by Dr. Hanzlik in support of his contentions, particularly that lead is more poisonous than arsenic and that lead is never present in the body in the absence of exposure.

I will be curious to know what you think of Dr. Hanzlik's paper after you have had an opportunity to read it.

With kindest regards,

Cordially yours,

Secretary.
