side, did you?

A No, not all the time. Sometimes I worked by myself and sometimes he worked by hisself.

Q Now, sir, you told the jury that you would work around the pipecoverers once in a while; is that correct?

A That is correct.

Q Am I correct, sir, that usually what would happen was they would have to finish a room before you could go in and do your work?

A Sure. They have to cover the pipes. If you have it in the ceilings, you can't close them without covering the pipe.

And we come and work on the walls until they were done. And if we had walls, they had pipe running through, we get that. And then we would work in the room on another wall.

And as soon as they get done, then we would get over there to where they were going.

Q They would go somewhere else and you go in and knock the whole room out; am I right?
