Bulletin G-62 Revision (Resin Identification)

Please direct this to the appropriate person(s) in your group or handle it yourself.

I am beginning to revise our Bulletin G-62 (Material Safety Data) for publication early in 1979. From time to time I will be asking your assistance in reviewing and revising various segments to produce an accurate document. This is my first request. Please review the list of Geon resins which now appears in G-62. 1) If there are any resins which have been deleted or will probably be deleted in the next 12 months, please cross them out. 2) If there are any new resins you now sell that do not appear on this list (and you expect them to survive) or there are sure-fire winners you expect to introduce, please add them. Please add the resins under the appropriate column. Of course, if you spot any errors with the current identification, please bring it to my attention.

I would appreciate knowing the person offering the change so I can go directly to the source should questions arise. Also, I would appreciate a timely response to this request. Thanks for your help.
