Re: Proposition 65 Information

Dear Mr. Trucker:

I recently received the attached forms regarding the presence of Proposition 65 chemicals in Conoco products. You should be aware that on July 20, 1984 the assets of Conoco Chemicals were purchased by Vista Chemical Company. The two products you sent forms for are produced by Vista. The following is based on those products.

Vista's caprylic may contain detectable quantities of Benzene.

It is not clear which Vista product you are referring to as Capryl Alcohol. This term can be used for octanol or decanol. Both products are manufactured by Vista. Based on analytical data currently available, no detectable quantities of Proposition 65 chemicals are present in either of those alcohols.

Please contact me at 713-531-3445 if you need further information.

Sincerely,

Thomas G. Grumbles, C.I.H.
Environmental Quality Manager
