PLEASE ADDRESS ANY REPLY TO
MEDICAL DEPARTMENT

From Dr. J.R.F. Williams.

15th November 1950.

Robert Kehoe, Esq., M.D.,
The Kettering Laboratory,
College of Medicine,
Eden Avenue,
Cincinnati, 19,
Ohio.

Dear Dr. Kehoe,

As Dr. Thomson is on a visit to India and the Far East at the present time, I am replying to your letter with regard to the stability of B.A.L. glucoside. I enclose some information on B.A.L. glucoside. At the moment, the substance is undergoing clinical trial in this country. I should be happy to let you have a small quantity if you would let me know how much you would require and I would be very happy for you to try it out in your animals, but at the moment we have not worked out the effective dose which should be used in man.

Yours sincerely,

A handwritten signature in dark ink, appearing to read "John A. Williams", with a long horizontal flourish extending to the right.
