## THIS MEMORANDUM

is an acknowledgment that a bill of lading has been received and is not the Original Bill of Lading, nor a copy or duplicate, covering the property described herein, and is intended solely for filing or record.

RECEIVED, subject to the classifications and tariffs in effect on the date of the receipt by the carrier of the property described in the Original Bill of Lading.

the property described below, in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed, as to each carrier of all or any of said property over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions of the Uniform Domestic Straight Bill of Lading set forth (1) in Official, Southern, Western and Illinois Freight Classifications in effect on the date hereof, if this is a rail or a rail-water shipment, or (2) in the applicable motor carrier classification or tariff if this is a motor carrier shipment. Shipper hereby certifies that he is familiar with all the terms and conditions of the said bill of lading, including those on the back thereof, set forth in the classification or tariff which governs the transportation of this shipment, and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

# THIS MEMORANDUM

is an acknowledgment that a bill of lading has been issued and is not the Original Bill of Lading, nor a copy or duplicate, covering the property named herein, and is intended solely for filing or record.

RECEIVED, subject to the classifications and tariffs in effect on the date of the receipt by the carrier of the property described in the Original Bill of Lading,

the property described below, in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed, as to each carrier of all or any of said property over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions of the Uniform Domestic Straight Bill of Lading set forth (1) in Official, Southern, Western and Illinois Freight Classifications in effect on the date hereof, if this is a rail or a rail-water shipment, or (2) in the applicable motor carrier classification or tariff if this is a motor carrier shipment. Shipper hereby certifies that he is familiar with all the terms and conditions of the said bill of lading, including those on the back thereof, set forth in the classification or tariff which governs the transportation of this shipment, and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

Dear Frank:

As per our discussion, to follow is a breakdown on delivered rail car shipments of Olympic Talc to your plants using existing freight rates and 1977 talc prices:

Jeffersonville, Indiana \$148.00/ton

Jersey City, New Jersey \$160.00/ton

These prices do not reflect the pending 5% freight increase or the cost of our laboratory running a T.E.M. on every lot of material.

As soon as we determine the costs involved in determining a T.E.M., I will be back to you.

Sincerely,

Ronald W. Grexa  
Product Engineer

Our bacterial control is excellent, according to Emily Owen, after revealing some sheets that I showed them from recent shipments to Avon. I would not let them photocopy the bacteria sheets at this time.

The meeting ended with Karl and Frank, who apparently are the key men to convince, that they would like a letter from us confirming that we would give them asbestos information on a shipment by shipment basis and they would, in turn, take a look at our Olympic Talc for physical and chemical properties.

OBJECTIVE:

Return call.

SUMMARY:

Frank wanted to know if we had calculated our pricing for Olympic talc based on running TEM determinations on each lot. Told him we did not, but probably would be included in the dollars per ton price. For internal information, and not for public knowledge, Frank gave me the 1977 forecast figures for talc for Colgate. From both plants it amounts to 1263 tons. Told Frank that as soon as I discussed this situation with LDM I would be back to him with some kind of figure.

ACTION REQUIRED:

Check with LDM on pricing on Olympic talc at Colgate.

# THIS MEMORANDUM

is an acknowledgment that a bill of lading has been issued and is not the Original Bill of Lading, nor a copy or duplicate, covering the property named herein, and is intended solely for filing or record.

RECEIVED, Subject to the classifications and tariffs in effect on the date of the receipt by the carrier of the property described in the Original Bill of Lading.

the property described below, in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, contained, and destined as indicated below, which said carrier (the word carrier being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed, as to each carrier of all or any of said property over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions of the Uniform Domestic Straight Bill of Lading set forth (1) in Official, Southern, Western and Multiple Freight Classifications in effect on the date hereof, if this is a rail or a rail-water shipment, or (2) in the applicable motor carrier classification or tariff if this is a motor carrier shipment. # THIS MEMORANDUM

is an acknowledgment that a bill of lading has been issued and is not the Original Bill of Lading, nor a copy or duplicate, covering the property named herein, and is intended solely for filing or record.

RECEIVED, subject to the classifications and tariffs in effect on the date of the receipt by the carrier of the property described in the Original Bill of Lading,

the property described below, in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed, as to each carrier of all or any of said property over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions of the Uniform Domestic Straight Bill of Lading set forth (1) in Official, Southern, Western and Illinois Freight Classifications in effect on the date hereof, if this is a rail or a rail-water shipment, or (2) in the applicable motor carrier classification or tariff if this is a motor carrier shipment.

Shipper hereby certifies that he is familiar with all the terms and conditions of the said bill of lading, including those on the back thereof, set forth in the classification or tariff which governs the transportation of this shipment, and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

# THIS MEMORANDUM

is an acknowledgment that a bill of lading has been issued and is not the Original Bill of Lading, nor a copy or duplicate, covering the property named herein, and is intended solely for filing or record.

RECEIVED, subject to the classifications and tariffs in effect on the date of the receipt by the carrier of the property described in the Original Bill of Lading.

the property described below, in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed, as to each carrier of all or any of said property over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions of the Uniform Domestic Freight Bill of Lading set forth (1) in Official, Southern, Western and Illinois Freight Classifications in effect on the date hereof, if this is a rail or a rail-water shipment, or (2) in the applicable motor carrier classification or tariff if this is a motor carrier shipment. Shipper hereby certifies that he is familiar with all the terms and conditions of the said bill of lading, including those on the back thereof, set forth in the classification or tariff which governs the transportation of this shipment, and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

OBJECTIVE:

At request of Colgate, sit down and discuss Olympic Talc and, in particular, asbestos.

SUMMARY:

Had a good session with these people, and they are not getting the proper cooperation from WC&D and they are, therefore, very interested in another source who will give them the appropriate asbestos information they desire.

DETAILS:

Most concerned with the fact that they would like a certification on each lot of Olympic Talc milled, with regard to asbestos determination by X-ray diffraction techniques, and possibly also by TEM techniques with a specific area electron diffraction pattern. Told them that I would discuss this with IDM and was fairly certain that we would be at least able to give them the X-ray diffraction on every particular lot. They feel that our Olympic Talc is not exactly as smooth as their present Whittaker source out of Alabama and that there would probably have to be some customer acceptance testing. I personally felt the two talcs while at the meeting, and I would not like to stake my life on which was smoother.

*No-  
yes*

It appears as if they would be very interested in our materials if we would give them some help with regard to asbestos information.

Karl will be looking at our Olympic Talc, to determine whether or not it fits their specifications, and will be getting back to me shortly with some information. If, in fact, we can give them the proper density material, they will then go into some customer testing.

November 1, 1976

Dear Frank:

Confirming our telephone conversation, we would charge you an additional \$5.00/ton for Olympic talc when performing the additional analytical work which you have requested. This \$5.00/ton upcharge would account for initially a slow scanning X-ray diffraction and then a transmission electron micrograph. If after these determinations we suspect the presence of asbestos, we would then perform a specific area electron diffraction.

With this upcharge, the price of our Olympic talc after November 1, 1976 would be \$115.00/ton FOB Montana. This price would include our \$10.00/ton price increase and the \$5.00/ton upcharge for the analytical work.

I will be in touch with you in the very near future concerning your final results of our Olympic talc.

Sincerely,

Ronald W. Grexa  
Product Engineer

# THIS MEMORANDUM

is an acknowledgment that a bill of lading has been issued and is not the Original Bill of Lading, nor a copy or duplicate, covering the property named herein, and is intended solely for filing or record.

plus a charge of \$6.50 per pallet. Colgate-Palmolive does not consider the subject invoice from Cyprus Industrial Minerals Company as valid and does not reflect the business transactions that occurred from October 3, 1979. Please review the above situation since we feel that we were not properly informed of the change in price from \$174/ short ton. We feel that old price should be maintained on the subject purchase order. Colgate-Palmolive values the relationship of buyer and seller and looks forward to a mutually agreed to business relationship.

Sincerely yours,

E. E. Nowack

## THIS MEMORANDUM

is an acknowledgment that a bill of lading has been issued and is not the Original Bill of Lading, nor a copy or duplicate, covering the property named herein, and is intended solely for filing or record.

RECEIVED, subject to the classifications and tariffs in effect on the date of the receipt by the carrier of the property described in the Original Bill of Lading,

the property described below, in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed, as to each carrier of all or any of said property over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions of the Uniform Domestic Straight Bill of Lading set forth (1) in Official, Southern, Western and Illinois Freight Classifications in effect on the date hereof, if this is a rail or a rail-water shipment, or (2) in the applicable motor carrier classification or tariff if this is a motor carrier shipment. Shipper hereby certifies that he is familiar with all the terms and conditions of the said bill of lading, including those on the back thereof, set forth in the classification or tariff which governs the transportation of this shipment, and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

# THIS MEMORANDUM

is an acknowledgment that a bill of lading has been issued and is not the Original Bill of Lading, nor a copy or duplicate, covering the property named herein, and is intended solely for filing or record.

RECEIVED, subject to the classifications and tariffs in effect on the date of the receipt by the carrier of the property described in the Original Bill of Lading.

The property described below, in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed, as to each carrier of all or any of said property over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions of the Uniform Domestic Freight Bill of Lading set forth (1) in Official, Southern, Western and Illinois Freight Classifications in effect on the date hereof, if this is a rail or a rail-water shipment, or (2) in the applicable motor carrier classification or tariff if this is a motor carrier shipment. Shipper hereby certifies that he is familiar with all the terms and conditions of the said bill of lading, including those on the back thereof, set forth in the classification or tariff which governs the transportation of this shipment, and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

Gentlemen:

Attached please find the following documents:

Our check #321111 dated 10/26/84 in the amount of \$3952.00

A copy of your invoice #25500 dated 10/9/8 in the amount of \$8325.

A copy of our NJS billing 51985 which reflects a return of material to you due to "MATERIAL DOES NOT FLOW. CANNOT BE USED IN PRODUCTION."

Copies of letters written to Cyprus Industries in Plainfield, N.J.

Please refer to the above mentioned documentation. In January of 1984, we returned material to your South Plainfield, N. J. entity. On several occasions we have written to them requesting payment for this return. To date, we have not had the courtesy of a reply from them.

Therefore, in order for us to recover our monies, when we received your invoice billing us for a shipment of material to be sent to our subsidiary in Colombia, we deducted the amount owed to Colgate Palmolive from this invoice.

If you have any questions concerning this transaction, please do not hesitate to contact the writer.

Very truly yours,

Dear Mr. Moebus:

Subject: Colombian Purchase Order COL 36-059-99

On October 3, 1979, Colgate-Palmolive New York placed purchase order COL 36-059-99 with Cyprus Industrial Minerals Company covering 67,500 lbs. of Regal North Carolina Talc. The subject purchase order was placed at \$174.00/ short ton FOB Alpine, Ala., and requested shipping date was December 9, 1979. This was the first purchase order placed with Cyprus Industrial Minerals since Charles Mathieu no longer services the account. No acknowledgement or communications were received from Cyprus Industrial Minerals. In the early part of January, the International Billing Department of Colgate-Palmolive notified me that requested proforma invoices denoting availability of product for shipment had not been received. Upon receipt of this information, the writer contacted Mr. Karl McCleandon and Mr. R. Moebus, and they informed the writer that it was the policy of Cyprus Industrial Minerals to only schedule production of material upon receipt of actual vessel bookings from buyers. Even though this is an unusual mode of business, the writer notified the International Billing Department to provide vessel booking information to Cyprus Industrial Minerals. At no time during this period was any mention of the change in pricing made known to Colgate-Palmolive Company. After shipment of product was made to Colombia, invoice was received covering the subject shipment with the billing price of \$226.39/short ton

# THIS MEMORANDUM

is an acknowledgment that a bill of lading has been issued and is not the Original Bill of Lading, nor a copy or duplicate, covering the property named herein, and is intended solely for filing or record. RECEIVED, subject to the classifications and tariffs in effect on the date of the receipt by the carrier of the property described in the Original Bill of Lading.

the property described below, in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed, as to each carrier of all or any of said property over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions of the Uniform Domestic Freight Bill of Lading set forth (1) in Official, Southern, Western and Illinois Freight Classifications in effect on the date hereof, if this is a rail or a rail-water shipment, or (2) in the applicable motor carrier classification or tariff if this is a motor carrier shipment. Shipper hereby certifies that he is familiar with all the terms and conditions of the said bill of lading, including those on the back thereof, set forth in the classification or tariff which governs the transportation of this shipment, and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

Gene thought that they should be having a second source, the usage at Jeffersonville is 1200 tons per year and their use in their east coast plant is about 1800 tons per year, all bought from a single source. Gene just can't see why they wouldn't do handsprings over our approaching them. He also indicated that the price of the Whittaker, Clark & Daniels material is approximately 7-1/2¢ a lb. They presently receive it in truckloads from Alabama but they do have rail facilities at this plant. He sees no reason why they wouldn't be able to receive it in carloads on Double Face 4-Way Entry Wooden Pallets.

ACTION:

Ron Grexa, the ball was in your court and I am sure that you can smash it into Colgate's court and win the game.

OBJECTIVE:

Determine status of Olympic talc.

SUMMARY:

Olympic talc has been given bacteria approval and it is going in for asbestos and bulk density as well as particle size testing. Colgate seems extremely interested in going to our Olympic talc especially because we can handle a lot of the lab work concerning asbestos which they are having sent out to McCrone in Chicago right now. HTM agreed to run certain asbestos tests (he agreed to discuss running these tests), after getting approval. At our meeting a timetable was set up and Frank Marshner is to get back to me in a week or two to obtain a 50# bag of Olympic and then they will go ahead and proceed to get together a panel test to determine if it would hurt going to our material vs the material they are presently using from Charles Mathieu. It was also mentioned during our meeting that they found some tremolite in their other talc source and this has really gotten them up in arms. Things look good here and I will await a call from Frank Marshner.

*for this was not in your report & maybe overlooked.*

DETAILS:

During our meeting HTM agreed to send to Karl Shumway a geological survey of our mine in Montana and also HTM offered to have them visit our Montana operation. Apparently they are using more than the 1,000 Tons that Margaret Lewis in New York mentioned. It looks from here to be more like 2,000 tons at both locations. Colgate is very impressed with our capabilities from a lab standpoint and I think this is our biggest selling point at this time.

OBJECTIVE:

Return call.

SUMMARY:

Frank wanted to know if the sample of classified talc that I sent to him had a lot number. I told him that this was an experimental material that we could not make it tomorrow if he needed it in large quantities but if he did have interest we could get a larger amount made. He accepted my information and did mention that he thought it was a beautiful looking cosmetic talc. This slip is apparently excellent according to Frank and it has all the qualities that they would like and he is putting it up for fragrance testing immediately. Lets hope it looks interesting and we will go from there.

Dear Frank:

We regret that you were unable to join Karl Shumway, Lou Murino and I recently. At that meeting, we discussed Olympic Talc and its rejection by your Fragrance Dept. It was decided to investigate just how the Olympic Talc was tested. Namely, if it were tested individually or along side a representative sample of recent production from your present supplier.

Karl agreed that your Fragrance Group should test a new sample of Olympic Talc from the 50 lb. bag I left during our visit, and also a sample of recent production from your present source. In addition, a re-sample of the Olympic Talc just tested should be included. In this way, our material as well as competition's will be fragrance tested side by side under the exact same conditions.

Hopefully, from this testing program we will be able to determine whether or not your present source of talc has changed to any degree in fragrance stability as well as the suitability of our material.

Lastly, for your information, the recent bag of Olympic Talc which Karl has is a slightly coarser particle size product which should improve fragrance stability on one hand and not drastically change any of the other physical characteristics of the product.

PERSONNEL AND TITLES

Doug Peddie, Purch. Agent (XC)

OBJECTIVE:

Discuss feasibility study involving the suspect light bulk density Monoblend talc.

SUMMARY:

After a discussion with LDM, I called Doug and confirmed that we would be willing to agree to the feasibility study to determine if the Monoblend talc will fill in their machines and remit payment of \$500 to \$600 if in fact the talc does not fill properly. However, on the other hand if the talc does fill properly there would be no charge to Cyprus and Colgate would remit payment for both truckloads. RWG asked Doug to keep DRF and myself apprised of when the study would be performed. Doug wanted a letter confirming our discussion which I promised to send.

ACTION:

Send letter to Doug Peddie and keep abreast of this trial.

# THIS MEMORANDUM

is an acknowledgment that a bill of lading has been issued and is not the Original Bill of Lading, nor a copy or duplicate, covering the property named herein, and is intended solely for filing or record.

RECEIVED, subject to the classifications and tariffs in effect on the date of the receipt by the carrier of the property described in the Original Bill of Lading,

the property described below, in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed, as to each carrier of all or any of said property over all or any portion of said route, to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions of the Uniform Domestic Straight Bill of Lading set forth (1) in Official, Southern, Western and Illinois Freight Classifications in effect on the date hereof, if this is a rail or a rail-water shipment, or (2) in the applicable motor carrier classification or tariff if this is a motor carrier shipment. Shipper hereby certifies that he is familiar with all the terms and conditions of the said bill of lading, including those on the back thereof, set forth in the classification or tariff which governs the transportation of this shipment, and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

P.O. Box 9

December 27, 1976

Dear Mr. McAdams:

? I was sorry to hear on my recent telephone call, that the decision has been made not to package cosmetic talc in the Colgate-Palmolive Jeffersonville plant in 1977. Our Olympic Talc which was recently approved as an alternate source to the Alabama talc which you are currently using, in 50# bags is \$110.00/ton, FOB Three Forks, Montana. This is our carload price. We also maintain warehouse stock of Olympic talc in both Chicago and Cleveland for users who are interested in less than carload quantities. Our LCL warehouse prices will be supplied upon request.

Enclosed with this letter is a copy of our Olympic Typical Data Sheet. In the event there is a change in plans and you are again interested in ordering Olympic talc, I suggest that such orders be phoned in directly to our Los Angeles office (213) 489-3700. Mr. Charles T. Elkins is the Manager of our Order Department and Diana Furman is his assistant. If you prefer, orders may be mailed to Cyprus Industrial Minerals Co., 555 South Flower Street, Los Angeles, California 90071.

If you have further questions in regard to our Olympic talc, please feel free to contact me.

Sincerely,

Owen G. Carpenter  
Technical Sales Manager

plus a charge of \$6.50 per pallet. Colgate-Palmolive does not consider the subject invoice from Cyprus Industrial Minerals Company as valid and does not reflect the business transactions that occurred from October 3, 1979. Please review the above situation since we feel that we were not properly informed of the change in price from \$174/ short ton. We feel that old price should be maintained on the subject purchase order. Colgate-Palmolive values the relationship of buyer and seller and looks forward to a mutually agreed to business relationship.

Sincerely yours,

E. E. Nowack

Dear Karl:

It was a pleasure meeting with you and your associates recently. After discussing your request with our management, it was agreed that we would test each particular lot of Olympic Talc with respect to tremolite using slow scanning x-ray diffraction techniques. We would also agree to a specific area electron diffraction on a limited basis, for example, every six months or once a year. The reason for this is based on the high cost of running such a pattern.

In review, our Olympic Talc would deliver in railcars to Indiana at a price of approximately \$0.069/lb (min. 80,000 lbs) and to Jersey City at a price of \$0.075/lb (min. 80,000 lbs).

This material is also available FOB Chicago and Trenton as follows:

|         |             |              |
|---------|-------------|--------------|
| Chicago | 30,000 lbs+ | \$ 0.080/lb. |
| Trenton | 30,000 lbs+ | \$ 0.085/lb. |

I will be recontacting you shortly to discuss the samples I left with you.

Sincerely,

Ronald W. Grexa

Dear Mr. Moebus:

Subject: Colombian Purchase Order COL 36-059-99

On October 3, 1979, Colgate-Palmolive New York placed purchase order COL 36-059-99 with Cyprus Industrial Minerals Company covering 67,500 lbs. of Regal North Carolina Talc. The subject purchase order was placed at \$174.00/ short ton FOB Alpine, Ala., and requested shipping date was December 9, 1979. This was the first purchase order placed with Cyprus Industrial Minerals since Charles Mathieu no longer services the account. No acknowledgement or communications were received from Cyprus Industrial Minerals. In the early part of January, the International Billing Department of Colgate-Palmolive notified me that requested proforma invoices denoting availability of product for shipment had not been received. Upon receipt of this information, the writer contacted Mr. Karl McCleandon and Mr. R. Moebus, and they informed the writer that it was the policy of Cyprus Industrial Minerals to only schedule production of material upon receipt of actual vessel bookings from buyers. Even though this is an unusual mode of business, the writer notified the International Billing Department to provide vessel booking information to Cyprus Industrial Minerals. At no time during this period was any mention of the change in pricing made known to Colgate-Palmolive Company. After shipment of product was made to Colombia, invoice

was received covering the subject shipment with the billing price of \$226.39/short ton

Frank Schebece, Chief Chemist

**OBJECTIVE:** Follow up on classified talc sample sent to Frank for evaluation purposes.

**SUMMARY:** Frank claims that the classified talc is a little better than the Olympic talc that we previously submitted, but they still rejected the material. In the past, the Olympic talc failed after two weeks under the elevated temperature testing of 110° C and 120° C. The classified talc sample failed after four weeks, however, the room temperature sample seems to be okay and that was not the case with the Olympic talc. The next move is up to us, and, frankly, I do not know where to proceed from here other than to possibly remove a little more of the fines from the classified material. RWG will have to discuss with LDM.

**ACTION**

**REQUIRED:** Check back with Colgate after discussing entire situation with LDM.

# THIS MEMORANDUM

is an acknowledgment that a bill of lading has been issued and is not the Original Bill of Lading, nor a copy or duplicate, covering the property named herein, and is intended solely for filing or record.

RECEIVED, subject to the classifications and tariffs in effect on the date of the receipt by the carrier of the property described in the Original Bill of Lading.

# THIS MEMORANDUM

is an acknowledgment that a bill of lading has been issued and is not the Original Bill of Lading, nor a copy or duplicate, covering the property named herein, and is intended solely for filing or record. RECEIVED, subject to the classifications and tariffs in effect on the date of the receipt by the carrier of the property described in the Original Bill of Lading.

the property described below, in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed, as to each carrier of all or any of said property over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions of the Uniform Domestic Freight Bill of Lading set forth (1) in Official Southern, Western and Illinois Freight Classifications in effect on the date hereof, if this is a rail or a rail-water shipment, or (2) in the applicable motor carrier classification or tariff if this is a motor carrier shipment. Shipper hereby certifies that he is familiar with all the terms and conditions of the said bill of lading, including those on the back thereof, set forth in the classification or tariff which governs the transportation of this shipment, and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.
