Subject: [EXTERNAL] Meeting Request: bp America, March 3-4, Washington, DC

Good Morning Mr. Cocodrilli,

I am reaching out to request a meeting on behalf of bp America in early March. Relevant to you in your new role at the Department of Energy, bp is a grant recipient or sub-recipient on a few projects that are currently underway. With this in mind, we would like to meet with you to discuss the importance of these programs to bp and their alignment with Sec. Wright's priorities for the DOE. Of specific note, bp is a sub-recipient to the Midwest Alliance for Clean Hydrogen (MachH2), a regional clean hydrogen hub awardee. We'd be happy to give you a brief overview of our project under the greater umbrella of the hub near the Whiting Refinery in Indiana.

Preferred times to meet:

- Monday, March 3, 12pm – 1pm
- Tuesday, March 4, 9a-3p

On these days, a member of our hydrogen and CCS business team will be in DC. If you are not available on these days, I would be happy to schedule a meeting at another time.

In the US, bp employs more than 30,000 people and supports more than 300,000 jobs. Since 2005, bp has invested more than \$150 billion in the US. We have a bigger footprint here than anywhere else in the world, and we're proud to be a trusted partner for secure, affordable and reliable energy. bp's Whiting Refinery has been a cornerstone of northwest Indiana's economy and is able to process around 440,000 barrels of crude oil daily. It is the largest refinery in the Midwest and bp's largest in the world producing 10 million gallons of gasoline, 4 million gallons of diesel and 2 million gallons of jet fuel daily, as well as 7% of all US asphalt.

Thank you in advance for your consideration of this request. I look forward to hearing back from you,
 Marcus
