Dr. Thomas F. Mancuso  
Research Professor  
University of Pittsburgh  
Graduate School of Public Health  
303 Flannery Building  
Pittsburgh, Pa. 15213

Dear Dr. Mancuso:

Your letter, addressed to Mrs. Lillian H. Frey of 326 Dover Street, Manheim, Pa., concerning the death of her husband, Harry F. Frey, has been referred to me for answer.

I represented Mrs. Frey in a compensation claim against Mr. Frey's employer, Raybestos Manhattan. The record of employment shows that Mr. Frey was employed from 1933 until the year of his death, 1961, by Raybestos Manhattan. During this entire period he was employed in the textile portion of the industry. It is generally conceded, and was conceded in this case, that there was an exposure to the hazard of asbestos in the textile portion of the industry. During the latter part of his employment he was working in a supervisory capacity but always in the textile portion of the industry. Prior to 1933 the only employment I have been able to discover was with the Bond Foundry and Machinery Company in Manheim where there would be no exposure of this type.

The cause of death was carcinoma of the lungs caused by asbestosis.

Incidentally, I represented the first claimant in Workmen's Compensation in Pennsylvania to be awarded compensation under the Industrial Disease Act, where death was the result of carcinoma of the lungs. This case was in 1954 and since then compensation has been awarded regularly in these cases. A great deal of the success of our original case was due to the study and work of Dr. Ward M. O'Donnell, who is the pathologist at the Lancaster General Hospital. Dr. O'Donnell has made a study of the relationship of asbestos and carcinoma. If you are not already familiar with Dr. O'Donnell's study, I believe that it would be to your benefit to contact him.

In the Taylor case, Dr. Wilhelm C. Hueper, who was then chief

Dr. Thomas F. Mancuso

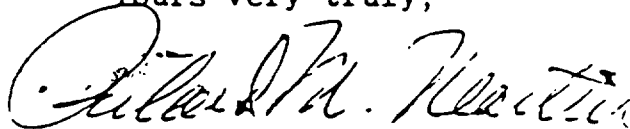

-2-

March 10, 1965

of the Environmental Cancer Section of the National Cancer Institute, testified that in his opinion cancer was caused by asbestos. I am sure that you are familiar with Dr. Hueper's work in this field.

If I can be of further assistance to you, please do not hesitate to get in touch with me.

Yours very truly,

A handwritten signature in cursive script, appearing to read "Richard M. Martin".
