VentbestosTM

VENTBESTOSTM is a woven asbestos fabric of Underwriters' grade, which weighs approximately 29 ounces per square yard. Underwriters' grade indicates that the fabric is made with 80% asbestos fibres, the balance synthetic fibres. The asbestos content of the fabric is non-combustible, but because the asbestos fibres have very little tensile strength the fabric cannot be tightly woven, and hence it is neither waterproof nor air-tight.

RECOMMENDED USES VENTBESTOS shares the disadvantages of all asbestos fabrics which cannot be closely
