

AN 4544
dated

April 6, 1990

Theresa Gerum
ALTC

SUBJECT: GEON 87402 BASED ON METHYLTIN (165-45-24-NATURAL)

The Geon compound 165-45-24 Natural is composed of ingredients which meet the current requirements of the FDA for use in contact with all types of food, except liquid milk under use conditions D, E, F and G as described in Tables 1 and 2 of 21CFR 176.170(c). The ingredients in this compound are listed on an appropriate regulation, or are generally recognized as safe (GRAS) or prior sanctioned for such use.

The final food contact article must meet the extractive limitations imposed by 178.3790.

To Theresa Geron - BFG Waterloo

To Wally Bahtal - BFG Bath

Theresa, attached is a recipe that will
be FDA for your beer malt application.

For Sampling Purposes, I recommend that
we call it Geron 87402, but give it a unique color
number (which I can get from the color lab).

Wally, Please send a letter to Theresa on
the FDA suitability of the attached recipe, for this
application.

We will use FDA pigments to color
match, when Theresa advises us of the desired color.

PROD. NO.

April 10
BFG 87402 based on methyl tin (for beer malt containers)

From previous of BFG-walrus made a revision of
87402 with methyl tin. The following recipe is proposed:
[Note that previous recipe composed 87645 is based on Mark 1900]

87-45-24 Natural

110 x 377	100	PVC	Fax to Wally: 216-374-2373
6-37	1	Wax E	Fax to Peter Thomas: 519-888-
10-37	.05	stearic acid	3388
P-31	2	Epoxydized Soybean oil	
Mark 1900	2	methyl tin	
BTA-733 * 710849	16		
2301 x 36 710600	2		

* Note BTA-733 instead of BTA-731; ⁷³³ ~~731~~ is an upgraded version.

Recommend that we call this 87402 - special color. Number for
Sampling purposes.
