Asbestos Textiles for I.C.I.

In view of the certainty now of I.C.I. seeking alternative materials for asbestos used in insulation work and also similar action by C.E.G.B., I think it would be as well to keep the Branches informed on these two subjects and I suggest that you write suitably to the Regional Managers. There is a report in my files from Mr. Wilkinson, if you have not seen it, and also the one from Newalls about I.C.I. at Slough.

I suggest that you send draft copies to Mr. Edmonds first as he is very much concerned with discussions at both these companies' head offices.

A. C. Mann.
