The proposed penalty for failure to correct each alleged violation is computed by multiplying a proposed daily penalty times the number of days the alleged violation remained uncorrected, counting from the prescribed abatement date to the date of reinspection. In the case of nonserious violations, the 50 percent adjustment for timely abatement, which had been deducted in calculating the initial proposed penalty, has been added to the proposed penalty for failure to correct.

Additional penalties may be proposed on a daily basis for each violation that is allowed to continue unabated beyond the date of reinspection appearing on the front of this form. You are to notify the Area Director named on the front of this form of the date and nature of any abatement action which you have taken.

The payment of penalties is to be made by check or money order, payable to the order of "Occupational Safety and Health-Labor". Remit to the Area Director whose address appears on the front of this notification.

YOU ARE FURTHER NOTIFIED that this notification and the penalties, as proposed, shall be deemed to be the final order of the Occupational Safety and Health Review Commission and not subject to review by any court or agency *unless*, within 15 working days from the date of receipt of this notification, you notify in writing the Area Director named on the front of this notification that you intend to contest this notification or the proposed additional penalty before the Review Commission. The Review Commission is an independent agency with authority to issue decisions respecting citations and proposed penalties including this "Notification of Failure to Correct Alleged Violation and of Proposed Additional Penalty".

There is no requirement that this notification be posted.
