September 18, 1979

Mr. Frank Jester
Gulf Oil Corporation
Engineering Division
Box 1357
Houston, TX 77001

Dear Mr. Jester:

Per our telecons on 9/17/79, enclosed are a price schedule and properties sheet for SG-130, our product most similar to Carey's 7TS1. This is our least expensive open fiber product and should be competitive on a cost/performance basis. I have also enclosed a copy of CertainTeed's brochure on their Model 440 Asbestos Bag Opener and our "RG-244 Health and OSHA Information". We do not have a similar booklet for SG-130 but the information may be useful to you. A sample of SG-130 is being sent to you from our plant in California.

If you have any further questions, please contact our southern salesman:

Mr. J. E. Walsh
Union Carbide Corporation
17 Executive Park Drive
Atlanta, GA 30359

404/321-6600

Very truly yours,

John L. Myers

John L. Myers
Marketing Manager

Blind Note to JEW: Jester is engineer designing new plant for producing a rubber-based adhesive. His phone is 713-750-3675. Talk to Ed Kleber before seeing Jester.
