Sangamo.

Jules Hydeck called 9/13 to ask for help. N.I.O.S.H. will begin a study of 30/40 workers in their Pickens N. Carolina plant this week. Sangamo were planning to appoint Dr Coulston of Albany Medical Centre as their advisor to look after Sangamos interests. Jules asked us to check with medical and advise if they had opinion on Coulstons expertise in this area. I called Jules back and reported George Roush's discreet comments on his professional colleague. Jules added that press reports suggest possible class legal actions against Sangamo. Their legal group are concerned.

Tim you should be alert to these two situations when calling on Sangamo. But do not discuss openly except with Jules since I do not know how aware general departments are of these developments.
