Subject: Re: Request for statement on air pollution and cardiovascular health.

Aditi,

Statement is attributable to Dr. Wayne Cascio, Director of EPA's National Health and Environmental Effects Research Laboratory.

Extensive scientific evidence shows that breathing in outdoor air particle pollution (fine particulate matter, PM_{2.5}) over the course of many years can lead to an increased risk of developing cardiovascular disease and dying from the disease. Short-term exposures to PM_{2.5} can trigger heart attack, ischemic stroke, abnormal heart rhythms and worsen heart failure in individuals with cardiovascular disease or older adults with medical conditions that put them at risk. The near-road environment also appears to affect heart and blood vessel function.

The study conducted in Great Britain by Dr. Nay Aung and colleagues in the journal *Circulation* supports an observation made in a large clinical research study called MESA Air carried out in the US and funded by the EPA and the National Heart Lung and Blood Institute that long-term exposure to the near road environment appears to affect the structure of the heart.

The current National Ambient Air Quality Standards for PM_{2.5} that protect public health from the detrimental effects of the air pollutant are based on this evidence. The EPA also provides guidance to communities to protect their residents from pollutants and noise produced in the near road environment.

Hi,

Unfortunately once the piece is pushed I won't be able to unpublish it. Let's try to have something soon, if not we'll have to go without it.

Thanks, Aditi. Good to know you can update the digital piece with the EPA comment. If you don't hear from me tonight with the statement, you may hear from a colleague on Monday.

Hi,

I'm actually at ABC News in New York. The headquarters. I work with all affiliate stations. This is a digital piece going out. Once we get our quote we can push it.

We don't need a comment on the study just what thoughts are on air pollution and cardiac disease.

Is there anyone I can speak to on the phone?

Aditi

When is the piece airing? Will you update if I don't get it approved tonight? This is the ABC affiliate in NY right?

On Aug 3, 2018, at 5:44 PM, Aditi Vyas [Ex. 6] wrote:

ahh did they approve it? My fingers are crossed.

Hi Enesta,

Thanks so much for your email.

Please see the attached study. The article has already been drafted and sent to the editors, we're just waiting on a BROAD comment regarding air pollution and heart health from the EPA.

Thank you and I look forward to hearing from you.

Aditi

Hello,

My name is Aditi Vyas and I'm a physician in the medical unit at ABC News and was wondering if I could speak to an expert on air pollution regarding a broad statement on air pollution and how it relates to cardiovascular health.

I spoke to Ms. Zito's office in San Francisco and was directed to email at this address.

Thank you so much.

Aditi
