

1 When is the last time you did any animal
2 experiments with chrysotile asbestos? When was the
3 last time you did that?

4 A Probably 1964 or '5.

5 Q Sir, you did not provide any kind of
6 written report in this case?

7 You didn't put anything down in writing; is
8 that right?

9 A No one requested it.

10 Q Now, sir, I also take it that you did not
11 take an asbestos-containing Ford brake and grind it
12 and do any kind of measurements like Dr. Millette did
13 in this case?

14 A Not in this case. I have certainly done it,
15 and I have done it in other circumstances, but I
16 haven't done it in this case for the purposes of this
17 matter.

18 Q You have taken an asbestos-containing Ford
19 brake and ground it and done air measurements?

20 A I am not certain that it was Ford, but it
21 was one certainly consistent with a Ford product.
