NEW LINED BRAKE SHOES FOR AIR BRAKE SYSTEMS

CONVENIENCE AND QUALITY FROM ABEX!

THE ABEX DIFFERENCE

Now you can get the ease and convenience of a new lined brake shoe but with one distinct difference — Abex quality brake lining on the shoe. The one important factor that is often overlooked in the purchase of relined or new lined shoes is that it's the brake lining that stops the vehicle. Abex has been producing premium quality brake lining for nearly 50 years and is the world's largest independent manufacturer of friction material. We have proven ourselves a leader in the manufacture of quality friction material in many areas, but most significantly under the new FMVSS 121 Brake Systems Standard. We are the only brake lining manufacturer that is approved virtually across the board by all brake, axle and vehicle manufacturers for application on their new 121 brake systems.

Abex IS quality — with the research and development, manufacturing and quality control expertise to produce superior friction materials. This assurance of quality in friction material together with the advantages of a new shoe offers you a convenience package unsurpassed in the industry.

The Abex New Lined Brake Shoe program is available in boxed wheel sets in the following part numbers and applications:

P4515F — Fruehauf Applications
P4515T — Timken Applications
P4311G — Eaton Applications
P4602R — Rockwell Wedge Brake Applications
P4602B — Bendix Wedge Brake Applications

These new lined shoes are now available for these applications lined with Premium Abex Heavy Duty Blocks. Upon request we will make this program available in the other formulations of friction material currently available from Abex in boxed sets. These will include Abex Extra Heavy Duty Blocks, Abex Logger Special Blocks, and the new Abex 121 Super Brakes. For more information on this new premium lined shoe program, contact your nearest Abex distributor or call or write:
