

1 A When I calculated, it was just slightly over
2 0.1, about .11 fiber per cubic centimeter on a time-
3 weighted average basis.

4 Q Okay. So this would be the time-weighted
5 average then?

6 A If one did that 22 minutes once a day, yes.

7 Q Of course, that requires you to make some
8 assumptions?

9 A Yes, sir.

10 Q Dr. Weir, as an industrial hygienist and
11 toxicologist, do you have an opinion to a reasonable
12 degree of scientific certainty as to whether exposures
13 in that range like we just calculated would be harmful
14 to humans?

15 A Yes, sir, I have an opinion.

16 Q And what is your opinion?

17 A There is no basis in the medical literature,
18 no basis in the medical science theory, and no basis
19 even in administrative regulations to support that
20 those levels will either cause or contribute to any
21 disease process.
