Muslin on Vase Decoration
in Amuletic Context Used at
Old Bridge

Pres. J. Monroe Q. A. Oak, E. K. Hamilton

14) Area of cardiac innervation - side
10 lbs. - probably near 4000 lbs or 80 lbs (Hypnotic) (Hypnotic)
Shivering - respiratory -
Pituitary - special ventilation
Bony - base in side
Calcium - probably in slow to or more - dependent
in side of the
Arteries - joined or joined from these into
the nervous system - high left to the heart. (Hypnotic)
The, probably, connect

Phase one steps proposed: JJM

1. Complete manuscript
2. Review
3. Resubmission
4. Publication

PLAINTIFF'S EXHIBIT

Q-920

Final program agreed:

1. Start as soon as possible and get aligned up
as near as 8 hrs per day as possible.

2. Stop work with an hour's rest.

3. Clean up mess; discuss it all

4. Contact DVN's on annual physical to start
about one year hence

5. Live like Mansville

Also a lack of major problem (maybe not, subject)

If manufacture continues in April 93a will be
injured.

King.

Re. Old bridge visit

Attached is a list given to me
by J. Kuch - (A) make a copy of it
for Oldbridge Permanent file —
He told me that this request was
made in 1-4-72 of D. Hoffman. —
I believe some data was sent to
Kuch by D. Hoffman. I'm not sure
which? He also told me that
the same request was made of you?
He might have meant to maintain?
(B) Call Kuch and find out what
he wants — then direct him to
source for him to order it

If our file can be of help have
been made copies of sample

Fiber glass, Lichen, Papane —

Finally, sent a paper copy to
Oldbridge Leonard's who I think
has been given help, kind of
help & list of items sent him.

Waj the MCA SG he is
referring to are in my letter
left side compartment.

Thank you for
the follow up.

Wedo
