May 31, 1983

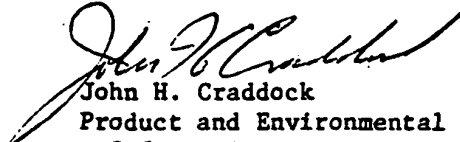

Mr. Ray Clark
Universal Manufacturing Corp.
902 Crescent Avenue
Bridgeport, CT 06607

Dear Mr. Clark:

Enclosed is some of the information we discussed regarding physical, mechanical and fire properties of PCBs from published bulletins. The old Monsanto technical bulletins and literature are generally out of print, therefore I have included data from other published sources that made use of the original Monsanto literature.

I hope this data is useful for your purposes.

Sincerely,

John H. Craddock
Product and Environmental
Safety Director
