Subject: Meeting follow up

Folks,

It was a pleasure meeting with you today. We sincerely appreciate your finding the time to meet with myself, along with Louis Rabman and Thomas Lorenzen. We respect your time and your consideration of our initiatives related to global emissions.

The technologies we have developed in conjunction with the Energy Environment Resource Center (EERC) of North Dakota, the EPA, and the DOE over the past decade are valuable to utilities both here at home and abroad. I very much value your willingness to guide ME2C on our efforts going forward to globalize these technologies.

The opportunity for us to host Administrator Pruitt at one of our utility customers in either Texas, Oklahoma, Louisiana, or Arkansas would be a terrific statement of recognition of American technologies by the EPA working to improve coal fired air quality successfully.

Once again, many thanks for your time and interest, I look forward to hearing from your designee to move this initiative forward.

Cheers,

Rick MacPherson
