ONE CONTROL DOES THE JOB OF TWO

DA-400

Available with
Explosion-Proof or
Weatherproof Housing

Mercoid DA-400 Series Pressure Controls incorporate a single bourdon tube which actuates two independently adjustable Mercoid magnet operated mercury switches to accomplish various circuit operations. For example:

1. Close one alarm circuit at high pressure and another at low pressure with both circuits open over operating range.
2. As an electrical interlock to open one circuit as pressure rises above and the second circuit as the pressure drops below operating range.
3. To provide two-stage control by opening or closing one circuit on a rise in pressure and the second circuit on a further rise in pressure.

Equipped with calibrated dial and outside adjustments—Ranges 0-30 psi to 300-2500 psi—The Mercoid magnet operated mercury switches are not affected by harmful effects of dust, dirt, or corrosion—your assurance of millions of operations.

Play it Safe with

NATIONAL SEAMLESS

● With pressures and temperatures constantly increasing, plant engineers everywhere are putting their complete confidence in U-S NATIONAL Seamless Pipe and Tubes. And for good reason. The life of a modern steam plant hinges on the dependability of its high pressure steam lines. And there is no more dependable power piping than NATIONAL Seamless—the famous "Walls Without Welds" that give you the extra margin of safety that only Seamless provides.

U-S NATIONAL Seamless has never been surpassed for power plant service, even under the severest operating conditions.

Pierced from solid billets of steel, NATIONAL Seamless Pipe and Tubes have the strength, uniformity, and dependability of solid forgings. Each length is an homogeneous steel cylinder with uniform wall strength throughout. NATIONAL Seamless is designed to remain structurally sound under high temperatures and intense pressures.

If you're planning the building of a new plant or repiping a present installation, remember to "play it safe" and specify NATIONAL Seamless Pipe and Tubes for longer, safer, more dependable, more economical service.
