

Pacific Steel Boiler DIVISION

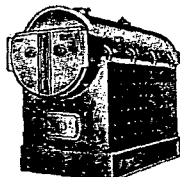

OF CRANE CO.
General Office: JOHNSTOWN, PENNSYLVANIA

Pacific manufactures a complete line of steel boilers for heating homes, commercial and industrial buildings. Exclusive design assures high performance in the three most important boiler characteristics: high efficiencies in all sizes—with all fuels; long life; minimum maintenance cost. Pacific boilers are built entirely of electrically welded steel, can be oil, gas, stoker or hand fired, and can be equipped with built-in domestic water heaters.

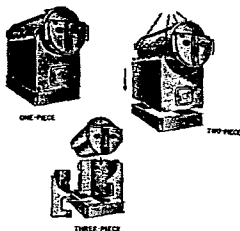

PACIFIC SBI RATED BOILERS

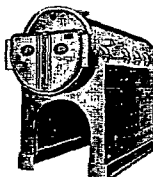

The Pacific High Firebox Boiler is a flexible unit with ample throat height for proper combustion with oil, gas or stoker firing. Built for 15 lbs. steam or 30 lbs. water. SBI gross outputs from 1260 to 18000 Mbb. SBI net ratings from 945 to 13500 Mbb.

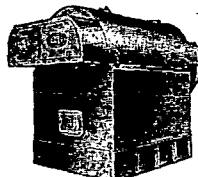

The Pacific Low Waterline Boiler is designed for easy installation where headroom is limited. Constructed for 15 lbs. steam or 30 lbs. water, for oil, gas or hand firing. SBI gross outputs from 1260 to 18000 Mbb. SBI net ratings from 945 to 13500 Mbb.

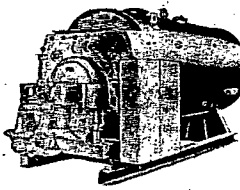

This Pacific 800 Series Scotch Type, Forced Draft Boiler is a wet-back boiler for oil, gas or gas-oil firing with forced draft burners. ASME construction, certified 80% efficiency. SBI gross outputs from 2000 to 22140 Mbb. SBI net ratings from 1500 to 16610 Mbb.

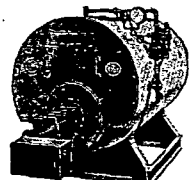

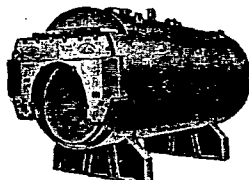

The Pacific LoSet Boiler is designed to meet the most rigid codes for proper burning of all grades of oil. Permits grade level engineering for low installation cost. Built for 15 lbs. steam or 30 lbs. water; boilers available for higher water working pressures. SBI gross outputs from 1260 to 18000 Mbb. SBI net ratings from 945 to 13500 Mbb.

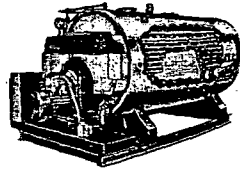

The Pacific Front Smoke Outlet Boiler has a greater percentage of prime heating surface, for faster steaming, greater fuel economy. Automatic or hand firing. 15 lbs. steam and 30 lbs. water. SBI gross outputs from 2160 to 18000 Mbb. SBI net ratings from 1620 to 13500 Mbb.

The Pacific 900 Series Scotch Type, Natural Draft Boiler is a wet-back boiler featuring compact design and low headroom. 15 lb. steam or 30 lb. water standard; boiler for higher working pressures available. SBI gross outputs from 1620 to 18000 Mbb. SBI net ratings from 1215 to 13500 Mbb.

This Pacific Scotch Type, 3-pass Packaged Boiler is a complete assembly with five square feet of fireside heating surface per boiler horsepower. Available in 20, 30, 40, 50 and 60 hp models for gas, oil or gas-oil forced draft firing.

The Pacific Scotch 2-pass Packaged Boiler is a completely packaged, wet-back assembly for gas, oil or gas-oil firing, factory assembled and ready for operation. SBI gross outputs from 60 to 463 hp.

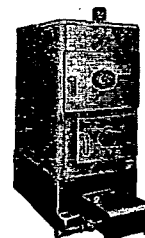

Split construction, available on all Pacific Commercial Firebox boilers, often saves hundreds of dollars by eliminating the need for opening up building walls. Component parts can pass through windows, doorways and skylights too small to accommodate ordinary boilers.

ASME & SBI APPROVED

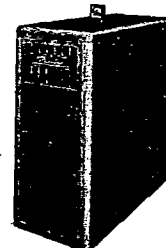

Every Pacific steel boiler is constructed in accordance with the rigid construction requirements prescribed in the Low Pressure Heating Boiler Construction Code of the American Society of Mechanical Engineers, for steel heating boilers (ASME). The approval symbol of the Steel Boiler Institute, Inc. (SBI) certifies that the boiler has successfully passed laboratory tests prescribed by the SBI Rating Code and will develop its cataloged rating in accordance with the performance requirements of this code.

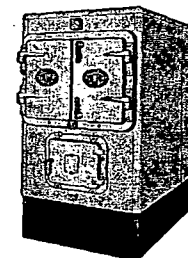

PACIFIC SBI RATED BOILERS

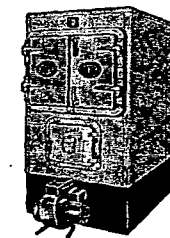

With the Pacific "700" Series Gas Unit, a certified burner and necessary controls are included to assure completely automatic operation and year-around comfort. Eleven sizes, with SBI gross outputs from 396 to 1800 Mbb. SBI net ratings from 297 to 1350 Mbb.

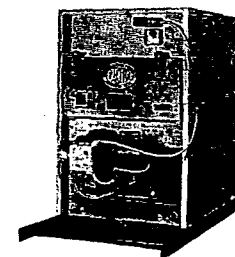

The Pacific "600" Series Boiler meets the needs of builders and contractors for a trim, modern compact boiler for modern homes. It is a laboratory-tested, performance-proved fire-tube boiler engineered for utmost heating efficiency and fuel-saving economy. It can be equipped with a Pacific domestic hot water heater, eliminating the need for a separate direct-fired hot water heater in the home.

This model of the Pacific "700" Series Boiler is designed for oil, gas, hand or stoker firing and assures high efficiency and low fuel consumption. It is ideal for large houses, multiple dwellings and small commercial installations. 15 lb. steam, 30 lb. water. SBI gross outputs from 396 to 1800 Mbb. SBI net ratings from 297 to 1350 Mbb.

The Pacific "700" Series Oil Fired Boiler Burner Unit is shipped with matched oil burner and automatic controls for fast, convenient installation at the job site. Available in many sizes, with ranges spanning the needs of almost all large residential and small commercial installations.

The Pacific "400" Series Packaged Boilers are shipped for convenient installation at the job site. Available in nine sizes that meet almost all large residential and small commercial installations, for oil, gas or gas-oil forced draft firing. SBI gross outputs from 324 to 1800 Mbb. SBI net ratings from 243 to 1350 Mbb.
