

Internal
Memorandum

Friction Materials
Division

Date September 27, 1972 Letter No.

Troy, New York

To Mr. T. E. Shelly

From Mr. K. W. Nasholds

Subject OSHA Label Requirements

We are attaching letters of September 15 from J. W. Armstrong to C. N. Menz and September 5 from C. E. Wasmuth, Jr. to J. W. Armstrong. Mr. Menz is desirous that we take immediate action with respect to conforming with the labeling requirements.

It looks as though we have the alternative of labeling each carton and/or pallet or having the cartons or containers themselves imprinted. Please investigate with the parties concerned and make a recommendation as to the most suitable procedure for us to follow. It would seem to me that imprinting our corrugated containers with a suitable notice might be the easiest and best way out. However, on the other hand, properly imprinted labels might be preferable.

The label or container imprint would be required to state

CAUTION

Contains Asbestos Fibers

Avoid Creating Dust

Breathing Asbestos Dust May Cause

Serious Bodily Harm
