Industrial Hygiene – Asbestos

Dr. Lanza tells me today that he has just received the completed manuscript from Lynch. Lanza is going to Pittsburgh, to be away until next Wednesday, and during this time he will review this manuscript with the view towards seeing that it is, in his opinion, satisfactory.

It is the plan then to have Drs. Packard and Vorwald, of Saranac, review it and agree that it is all right, after which it will be promptly put into print.

It is hoped that this will be available in time for the Saranac symposium that is to be held in the late summer or early fall so that all those who attend and are interested in this subject can be given the information. This, of course, would be particularly of value for the Government medical people in Quebec.
